

Security Operations: Defence in Depth

Defence in Depth

Layers of Security

"No one security single layer will protect against all forms of attack. You need several layers of security plus end-to-end visibility to remain secure"

Perimeter Security

Network Security

Intrusion Protection | Firewall | Security Gateways

Advanced Email Security

Business Class Email | Virus | Spam | URL link protection

Endpoint Protection

Next generation AI based protection

Employee Training

(Proactive)

Policy Management |
Secure Operations Practices | Threat Hunting

Data Backup (Reactive)

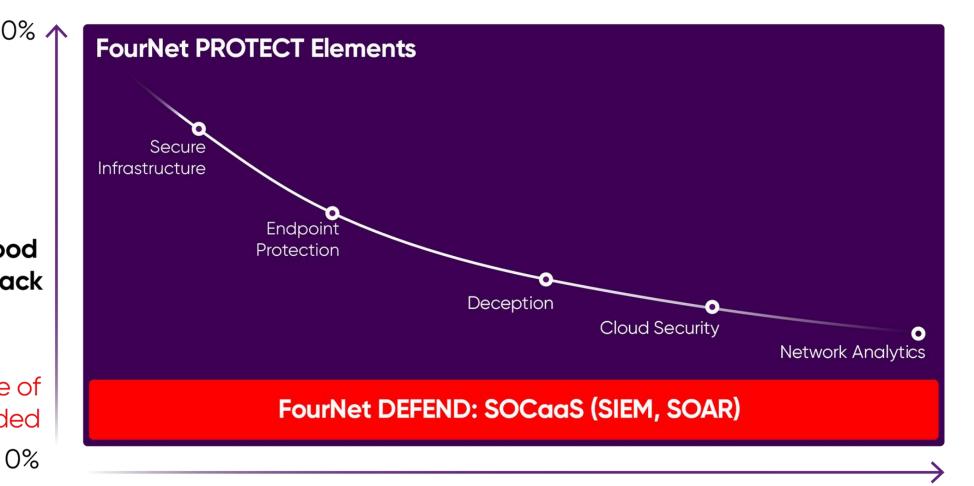

Monitoring + Response SOC & SIEM

Defence and Protection in Depth

100% 4

Likelikehood of an attack

Chance of being hackded
